

Update on [Why Did the World's Most Advanced Electronics Warfare Plane Circle Over The White House on 9/11?](#) By Mark H. Gaffney

October 23, 2007

Dear Editor:

It will interest your readers that CNN has now confirmed the basic facts regarding the USAF E-4B fly over of the White House on 9/11. On September 12, 2007 CNN finally aired some video footage of the event captured by one of its own reporters, evidence which had been gathering dust in the CNN archive for nearly six years. It appears that we prodded CNN into action. Chalk up a small victory for 9/11 truth.

Of course, the US military continues to deny that any such plane was in the sky. Obviously our work is unfinished.

The CNN footage is stunning, and is definitely worth a look. Here is a link for the benefit of your readers:  
[http://rawstory.com/news/2007/CNN\\_investigates\\_secret\\_911\\_domsday\\_plane\\_0913.html](http://rawstory.com/news/2007/CNN_investigates_secret_911_domsday_plane_0913.html)

Readers are also advised that because this story has evolved, an updated version of my original paper has just been posted. The latest draft includes new evidence and a deeper analysis.

Sincerely for 9/11 truth,

Mark H. Gaffney
